Overview

Full-Stack Developer with a strong frontend foundation and a proven track record of delivering scalable **web and mobile solutions**. Proficient in TypeScript, React, React Native, and Node.js, I specialize in building performance-driven applications that prioritize exceptional user experience. Experienced in managing complex integrations and real-time features, I thrive in agile environments writing secure, efficient code. I am dedicated to helping brands optimize operations, scale seamlessly, and maintain a competitive edge across all digital platforms.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C++

Frontend: Next.js, React.js, React Native, HTML5, CSS3, Tailwind CSS, Shadcn UI, Material UI

Backend: Django, Node.js, Express.js, NestJs

Databases: MongoDB, PostgreSQL, MYSQL

API Development: RESTful API design, Django REST Framework, Express.js APIs

Other: Creating reusable UI components, API documentation, Swagger

WORK EXPERIENCE

(Luminar Technologies – Remote, September 2025 – Present) — Frontend & Mobile Developer

- Engineered a comprehensive **Video Content Management System (CMS)** for web, optimizing asset delivery and user engagement.
- Developed and launched cross-platform mobile applications using **React Native**, ensuring feature parity between iOS and Android.
- Integrated secure **Payment Gateways** (RevenueCat/Razorpay) across web and mobile platforms to facilitate seamless financial transactions.
- Architected a robust **Authentication Flow** and real-time **Google Maps integration** for a ride-hailing style app, featuring live location tracking and route optimization.
- Utilized **React.js** and **Tailwind CSS** to build high-performance, scalable web interfaces with a focus on intuitive UX.
- Managed mobile state and navigation, ensuring smooth transitions and offline-first capabilities for mission-critical features.

(GrowNext – Remote, Feb 2025 – July) — Full Stack Developer

[Live demo](#) [Work proof](#)

Indian startup building a Jira-like project management platform with advanced task handling, employee management, and documentation features.

- Built responsive UIs in **Next.js** using **Tailwind CSS** and **Material UI** for project and employee management modules.
- Managed state with **Redux** and developed backend APIs with **Node.js**, **SQL**, and **Prisma**.
- Delivered a Notion-like documentation feature to enhance team collaboration.
- Collaborated via GitHub using branching, pull requests, and code reviews in an Agile workflow.

Bangladesh 2024 (Volunteer) — Frontend Engineer

[Live demo](#) [Work proof](#)

- Developed responsive web interfaces from Figma designs using **Next.js**, **TypeScript**, **Shadcn UI**, **MUI**.
- Created reusable UI components including modals and form elements for an internal data engine tool.
- Contributed to 30% of the project's core frontend development and maintained ongoing bug fixes.

PROJECTS

Pixello — Full Stack Developer(2025 – Present)

[Live demo](#) [Github](#)

- Developed a fully-featured social media platform backend using Django and PostgreSQL with JWT-based user authentication (registration, activation, password recovery).
- Designed and documented REST API endpoints with Swagger, covering core social media features like user posts and interactions.
- Built a responsive frontend with React.js, implementing landing page, user dashboard, post feed, and integrated payment gateway.

EDUCATION

International Islamic University Chittagong — 2026 (Expected)

Bachelor of Science in Computer Science and Engineering

GPA: 3.69/ 4.0
